DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 32 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claim recites a computer readable medium comprising software than is not "tangibly embodied".

2. Applicant argues that "carrier waves" are "tangible" in the remarks filed on November 4, 2005. At present, carrier waves are not suitable computer readable medium and thus are "intangible".

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claim 32 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The insertion of "tangible" in claim 32 is considered new matter.

Allowable Subject Matter

5. Claims 2-26, 28-31, 33-39 are allowed.

6. The following is an examiner's statement of reasons for allowance:

Claims 2-26, 33-36, 38-39 are allowable over the prior art of record because the prior art fails to teach or suggest a computer system to provide at least one telephone feature to a telephone of a user, the network comprises a bi-directional protocol layer and a uni-directional protocol layer, wherein direction of the uni-directional protocol layer communicates is from the computer system to the computer, i.e. pushing information from the computer system to the computer as amended by applicant.

Claims 28-31, 37 are allowable over the prior art of record because the prior art fails to teach or suggest sending a refresh request to the graphical user interface to prompt the computer to request an update on a state of the telephone as amended by applicant.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patrice Winder whose telephone number is 571-272-3935. The examiner can normally be reached on Monday-Friday, 10:30 am-7:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jason Cardone can be reached on 571-272-3933. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
